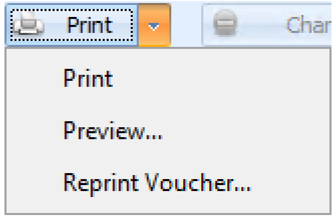
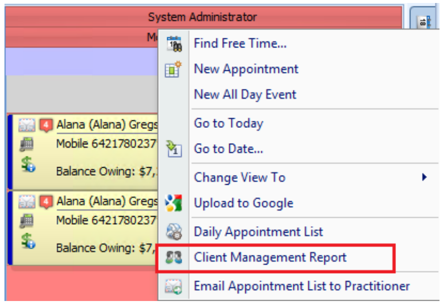
Bp Allied
Software for your Allied Health Practice

V6 Sp3 Enhancements

<table>
<tr><th>Module</th><th>Item Fixed</th><th>Issue #</th></tr>
<tr><td>Medicare / DVA</td><td>DVA and Bulk Bill vouchers can now be reprinted for these invoices via the Print button.


</td><td>BPA-328</td></tr>
<tr><td>Appointment Book</td><td>The Client Management Report has been designed as a printable report with details of all the appointments in a selected period of time along with related client information like current Referrals, outstanding Tasks and appointments attended in relation to the referrals and this year. It is available by right clicking on the Appointment Book header.



If your practice has multiple current referrals for a client turn on the Allow Multiple Current Referrals option in Options > Client Details. All current referrals for a client will display in the report.
Also available from Reports > Client Details
Will only allow printing of Clients that the practitioner has Demographic access to unless permission 1016 (Reports - Can see All Clients in All Permitted Reports) is turned on.
</td><td>BPA-272</td></tr>
</table>

Module	Item Fixed	Issue #
Appointment Book	Current Referral details can now be viewed in the [Appointments Referrals]() drop down and all details can be easily viewed in the expanded drop down. 	BPA-272
Options	A new practice-wide option called All Multiple current referrals is available to be set in Options > Client Details. This allows a practice managing multiple current referrals for a Client all to be selected. All current referrals will display in the new Client Management Report. If selected, then when adding an appointment, the one with the latest date will automatically be added. 	BPA-272

Module	Item Fixed	Issue #
Options	In [Options > User Administration] show the users permissions role in the header and a User Search for finding users easier.  	BPA-341 BPA-346
Reminders	BpA SMS now has the ability to see Delivery Receipts for any SMS's that are sent. These are available via Reminders > [SMS Delivery Status]. Reminders can be viewed via the Appointment Date. All SMS's sent can be viewed by the SMS Sent Date.	BPA-321

V6 SP3 Bug Fix Release Notes

Module	Item Fixed	Issue #
Appointment Book	Unable to navigate the calendar forward or back 3 months or more without a red X error. Removed the Practitioners availability and free time calculation from the calendar header which fixed the performance issue causing this error.  	BPA-225
Client Details	Printing Consultations updated to include printing today's consultation notes	BPA-318
Client Details	Save Client Image – updated Cancel button to cancel screen. Updated behaviour to clear the client image after adding an image to a client and then moving to another client. This gave the impression that the image has been assigned to multiple people where in reality it was only assigned to the correct person.	BPA-355
Client Details	[Practice Layout] not syncing when Options > Documents > Upload only when syncing files is checked. This file will now sync if this option is checked and Use Practice Layout is set. Please note that the Practice Layout only saves to the local documents folder and [Sync Network Docs] needs to run if the layout has been changed on a syncing computer for the	BPA-336

Module	Item Fixed	Issue #
	changes to be pushed up to the Network Server. All other syncing computers will need to run a Sync Network Docs to get the new Practice Layout file	
Client Details	Client Layout files for new upgrades from version 4 will now display all new fields in the layout on opening.	BPA-338
Healthpoint	Tyro Healthpoint will not pull provider number if Health Fund is set to <All> for provider number. This is now fixed to allow multiple Health Funds to use the same Provider Number if required.	BPA-329
Medicare	Error handling for messages coming from Medicare if there are issues with their portal. Message is now displayed to the user.	
Medicare	AuthGroups Report > displaying No Medicare Certificate message for Direct Authentication clients when not relevant.	
Medicare (See additional documentation)	Name validation checks – these have been added and extended in the following locations: • Clients > Details – First Name / Last Name • On lodging a Claim • On adding a new Client of Bp Allied if you have Medicare Online Claiming enabled. New checks include checking to ensure that any of the following are not sent in the First Name or Last Name fields to medicare !@#$%^&*(),.?/{}|+=:;[]<>" Only the following values are valid in a Name being sent to Medicare: Letters, apostrophes, hyphens and spaces. Note that there can be NO spaces before or after an apostrophe or a hyphen.	BPA-347 BPA-356 BPA-357
Medicare	Blank claimant address line causing an error when claim sent to Medicare. Claim details updated to send Address Line 2 as null if there is an empty string and no data to send.	BPA-347 BPA-359
Medicare (See additional documentation)	Patient Claims (Claim Type = Medicare) - Move Delayed or Lost Medicare claims to the Pending tab so that when/if a patient contacts the clinic to say that they haven't been paid, the claim can be Manually Declined and then resubmitted	BPA-347 BPA-358
Options>MailChimp	MailChimp API updated so that it does not try to resubscribe unsubscribed clients.	BPA-342
Options	The option to add an AuthGroup to anything other than the "Medicare Online" or ALL HealthFund options has been removed from Options > User Administration > Provider ID's. This was causing errors processing HealthFund claims.	BPA-367
Referrals	Message is displayed if deleting a referral that has been used as part of a Medicare claim and prevents the deletion of the referral	BPA-325
Referrals	Adding a new referral was leaving the existing referral checked as well as checking the new referral. Intended behaviour implemented is to leave the new referral checked and uncheck any other referrals unless Allow Multiple Current Referrals is Checked.	BPA-272
Referrals	Adding a new referral from an Appointment causes the application to crash	BPA-369
Reports	No Future Bookings Report updated to exclude inactive clients if the Option "Include Inactive clients in client list" is unchecked. This is inline with all other reports in the application.	BPA-340

V6 Sp3 Documentation Updates
