Patients registered with MyMedicare will be required to access the plan and review items through the practice where they are registered. All other patients can access the items through their usual GP.

GPs can refer patients with GPCCMPs directly to AHS with no need to consult with two other providers. The EPC Referral form is no longer required for AHS. A standard GP referral can be used.

Available for patients with at least one medical condition present for 6 months or terminal. Patients with TCAs or GPMs in place can continue to receive services for those plans until 2027.
